

| PAEDIATRIC

PAEDIATRIC ANKLE FOOT ORTHOSIS, A.F.O.

APPLICATION

Designed to limit plantarflexion and moderate ankle inversion and eversion

- Anterior trim lines make A.F.O. quite rigid
- Can be trimmed back to allow more dorsiflexion
- For use within patient's footwear
- High fatigue strength polypropylene
- Touch tape closure
- Trim lines are slightly more anterior than leaf spring type. This makes for a fairly rigid orthosis. Can be trimmed back to allow for more dorsiflexion

TGA Registered: ARTG No. 139559

ORDERING INFORMATION

- Sizing Measure your patient from back of heel to centre of 1st metatarsal head. This measurement should correspond to the nearest A.F.O. length (See chart)

Note: These A.F.O.s fit most but not all patients. Where other foot deformities or complex problems exist, consult an orthotist.

A.F.O. Dimensions						Wholesale Price: \$66
Size	Length	Height	Calf Circumference	Left	Right	
1	100 mm	165mm	150 - 190mm	L4012	L4017	
2	113 mm	190mm	190 - 230mm	L4013	L4018	
3	120 mm	230mm	215 - 240mm	L4014	L4019	
4	133 mm	250mm	230 - 265mm	L4015	L4020	
5	152 mm	280mm	250 - 290mm	L4016	L4021	

PAVLIK HARNESS

APPLICATION

Treatment of Developmental Hip Dysplasia (C.H.D.)

- Well padded
- No metal buckles
- No latex
- Quality hook and loop closures
- Easily changed from closed to open toe
- Holds legs in Frog position while allowing hip movement

TGA Registered: ARTG No. 136642
